## EDUCATION

### University of Cincinnati

Master of Engineering, Computer Science

Cincinnati, OH

May 2025

### Raghu Engineering College

Bachelor of Technology, Computer Science and Engineering

Visakhapatnam, AP, India

July 2021

## EXPERIENCE

### Software Developer

AI For All LLC

Nov 2024 - Present

Columbus, OH, USA

- Building an AI-powered investigation platform from scratch that processes multimedia content through transcription and media conversion, enabling chatbot-driven Q&A. Utilized AWS services like Cognito, S3, DynamoDB, and SageMaker. Deployed the application on AWS GovCloud using EC2, ensuring CJIS compliance.
- Developing a web game with 9 interactive modules using Unity(WebGL), integrated with Angular and .NET framework. Added Google SSO, OAuth 2.0, and Firebase phone authentication for secure access. Deployed modules on AWS S3 with CloudFront for static hosting. The modules are now being utilized as part of a single-credit high school course.

### Graduate Desk Assistant

University of Cincinnati

Jan 2024 - Present

Cincinnati, OH, USA

### Digital Specialist Engineer

Infosys Limited

Aug 2021 - July 2023

Hyderabad, TS, India

- Developed full-stack web applications using ASP.NET Core, C#, Angular, JavaScript, and SQL Server, contributing to 8 major and 2 minor releases for a leading Canadian Insurance/Mortgage firm.
- Applied Factory Design Pattern to create modular, reusable components, enhancing maintainability and scalability across the application and configured CI/CD pipelines in Azure DevOps, utilizing Azure Pipelines and YAML
- Established NPS payment gateway in the application using technologies such as Stripe and RESTful APIs, allowing secure and efficient processing of multiple payment methods (cheque, wire, electronic), which elevated transaction speed and reduced payment errors by 25%.

### Program Analyst

Cognizant Technology Solutions

Mar 2021 – Aug 2021

Hyderabad, TS, India

- Utilized SSIS, SSRS, and SSAS to optimize ETL workflows, reducing data processing time by 40%, crafted OLAP cubes for in-depth multidimensional analysis, while using Azure Data Factory for cloud-based ETL solutions.
- Designed interactive Power BI dashboards with custom KPIs using DAX, providing stakeholders with real-time insights and data-driven recommendations that improved decision-making speed by 30%.

### Freelance Software Developer

Mitraya Infologic Services

Aug 2019 - Mar 2021

Visakhapatnam, AP, India

- Configured scalable RESTful APIs and microservices using Java, Spring Boot, and Hibernate, integrating with a PostgreSQL database, reducing response time by 40%.
- Incorporated Spring Security and OAuth 2.0 for authentication, Redis for distributed caching, and RabbitMQ for asynchronous messaging, while automating CI/CD pipelines with Jenkins and Docker.

## PROJECTS

### AI-Driven Virtual Assistant | OpenCV, TensorFlow, NLP, Django, PostgreSQL, Docker

Sept 2023 - Jan 2024

- Generated a precise Deep Learning model with an F1 score of 0.72, using TensorFlow and OpenCV for real-time object detection and generation of context-rich narratives.
- Implemented speech synthesis using LLMs (Hugging Face Transformers) and Google Text-to-Speech, enabling real-time narration of visual content which boosted user engagement by 25%.
